Job Title

Front-End Developer | Expert in React & Next.js

Innovative and detail-oriented front-end developer with expertise in building responsive, user-friendly web applications using React and Next.js. Skilled in modern JavaScript, HTML, CSS, and UI/UX design principles. Proficient in state management tools like Redux Toolkit and Context API, as well as efficient data fetching with React Query and Axios. Focused on delivering high-performance, cross-browser compatible applications with clean and maintainable code. Committed to enhancing user experiences through creative solutions and industry best practices.

Work Experience

Active4Web - Based in Cairo |Front-End React & Next.js Developer 8/2021 –2024/8

Developed high-performance web applications with React.js and Next.js, optimizing user experience and Search engine optimization (SEO).

- **Developed high-performance web applications** using React.js and Next.js, enhancing SEO and optimizing user experiences for better visibility and engagement.
- **Collaborated with cross-functional teams to create scalable, responsive solutions, ensuring seamless performance across devices and browsers.**
- **Improved load times and user interactions by utilizing React Query for efficient data fetching and caching, resulting in faster and smoother applications.**
- **Designed and implemented reusable UI components** that adhere to clean and maintainable code practices, promoting code reusability and reducing development time for future projects.
- **Built responsive and visually appealing interfaces** with Tailwind CSS and Bootstrap, aligning with brand guidelines and enhancing usability.

Projects

E-commerce Onlineshop (View the project)

Designed to deliver a seamless and localized shopping experience, the platform features multi-language support powered by i18n.js (Arabic/English) and is optimized for SEO to boost product visibility. Built a responsive, user-friendly admin dashboard with Bootstrap, enabling efficient management of products, orders, and customer data. Leveraged Axios and React Query for robust API data fetching and state management, ensuring fast load times, smooth navigation, and an engaging user interface with interactive elements like Slick Slider for product carousels.

Dental Clinic && Dashboard (View the project)

Designed to streamline clinic operations and elevate patient management, the platform allows clinic staff to efficiently handle patient records, schedule appointments, and manage clinical data. This robust system improves workflow efficiency and enhances patient experience by providing organized, real-time access to critical information.

Hr AI System

Created an intuitive platform with AI-driven features for predictive performance analysis and automated leave approvals, enhancing administrative efficiency and user experience. Integrated multi-language support (Arabic/English) for a localized experience and developed a responsive admin dashboard with AI insights for data-driven decision-making. Leveraged Redux Toolkit for state management, React Query and Axios for efficient data fetching, and React Router for seamless navigation, while implementing AI-enhanced role-based access control to streamline role assignments and permissions.

managment-system

Developed a robust task management system using React.js
Designed for companies to effectively track employee tasks and generate detailed manager reports. Implemented multi-language support with i18n.js (Arabic/English), providing a tailored, localized experience. Built a responsive admin dashboard with Bootstrap, enabling administrators to manage tasks, monitor performance, and oversee daily operations with ease. Integrated role-based access control for tailored permissions, and used Redux Toolkit, React Query, and Axios for streamlined data management and navigation. Added Slick Slider and Font Awesome for a dynamic, user-friendly interface, ensuring responsive and seamless usability across all devices.

Dashboard-Web

Led the design and development of a comprehensive dashboard application using React.js
Built an intuitive, responsive interface for administrators and stakeholders, using Bootstrap for optimal cross-device performance. Enhanced navigation and visual appeal with Font Awesome, and utilized React Query for real-time data fetching, ensuring smooth interactions. Integrated Redux Toolkit for state management and Firebase notifications for instant alerts on key events. Used React Router DOM for seamless navigation and DataTable with 2Path for dynamic data management, providing actionable insights and a detailed overview of key performance indicators to support informed decision-making

Skills

- HTML5
- CSS3
