Summary

Full-Stack Developer | Next.js, React.js & Java Spring Boot

Front-End Developer with **2 years of experience** building responsive and scalable web applications using **React.js and Next.js**. Recently expanding into **Back-End development with Java Spring Boot**, with knowledge of **REST APIs, Spring Security, and database integration**. Passionate about clean code, performance optimization, and building real-world business solutions

Work Experience

Front-End Developer | Salesboom CRM – 3/2025 – Present

- Developing scalable web applications using React.js & Next.js with reusable components.
- Integrating REST APIs and optimizing performance and user experience.

Trainee | Backend Java & Angular Developer | Innovate-mea | Jul – Dec 2025

- Gained hands-on experience building RESTful APIs, implementing authentication, and integrating Oracle DB with Java Spring Boot.
- Developed responsive frontend features using Angular.
- Collaborated with team to understand workflows and enhance full-stack skills.

Front-End Developer | React & Next.js Active4Web –08/2022 – 08/2024

- Built responsive, high-performance web apps with React.js/Next.js, focusing on SEO and UX.
- Created reusable UI components using Tailwind CSS and Bootstrap.

Projects

[E-commerce Onlineshop \(View the project\) \(Next.js\)](#)

- Built a responsive multi-language e-commerce platform with SEO optimization using Next.js .
- Developed an admin dashboard with Bootstrap, Axios, and React Query for efficient data .

[E-commerce Platform with Admin Dashboard \(React.js & Spring Boot\) Watch Demo](#)

- Built a responsive admin dashboard using React.js with reusable components.
- Developed and integrated RESTful APIs using Spring Boot for data management.

[E-commerce \(View the project\) \(Angular\)](#)

- Developed a role-based management dashboard using Angular, Bootstrap, and RxJS.
- Integrated RESTful APIs for real-time management of users and system data.

[Task & Team Management System \(Angular, Spring Boot\) - Watch Demo](#)

Developed a scalable task management system that enables managers to assign and distribute tasks efficiently, track employee progress, and monitor workload in real-time. Built using Angular and Spring Boot, with secure JWT authentication, role-based access control, RESTful APIs, and performance reporting (daily, weekly, monthly) to enhance productivity and team visibility.

[Skills](#)

[Technical Skills](#)

- **Frontend:** HTML ,CSS, JavaScript, TypeScript , React.js, Next.js
- **Backend:** Java, Spring Boot, Spring Security, REST APIs
- **Database:** Oracle, SQL
- **Concepts :** OOP , SOLID Principles , Design Patterns , Clean Code

[Education](#)

Bachelor of Management Information Systems

Faculty of Commerce – 2020–2024 | Grade: Good
